On Track

MX SCHOOL

Tell us a little about you and about your education program?

Well, my name is Andrea Leib and I run "On Track". It is a distance learning program that I customize on an individual basis. The kids can still get a cutting edge education while pursuing their dreams at the motocross track. On April 10th I presented Tyler Wharton his high school diploma that is nationally accredited, and is a high school equivalency diploma which is the way to go. Tyler worked real hard. It really took a weight off his shoulders and his moms. He knows that no matter what happens he's got his diploma. On top of it all he even came away with some confidence to know what ever he wants to do in his future, that is behind him and he can excel with whatever avenue he wants to go after motocross.

The On Track program is a K-12 educational program that I have put together with different sources of curriculum. The first thing I do is give students a learning style profile. It tells me how they learn best, what kind of learner that they are, because I do not believe education is cookie cutter. I believe that I can modify things to fit the students so that they can actually have fun while they are learning.
